Can a solar inverter connect to WiFi?

Modern solar energy systems are increasingly adopting smart technologies, and one of the most impactful upgrades is connecting your solar inverter to WiFi . With TechFine’s intelligent solar inverters equipped with integrated WiFi modules for solar inverters , users can now monitor their system remotely via a smartphone or web portal.

How do I connect my techfine solar inverter to WiFi?

Make sure that the PWR indicator light on your TechFine solar inverter is illuminated, indicating proper power supply. Tap the “Wi-Fi Configuration” button to enter the network setup page. The app will begin scanning for nearby devices — locate and select your TechFine inverter from the list.

How to install solar inverter?

You have three options to get started: Method 1 : Scan the QR code located directly on the surface of your inverter. Method 2 : Use the QR code printed on the packaging film. Method 3 : Search for the app named “Solar of Things” in your phone’s app store and install it.
