What is a balcony Solar System?

Balcony solar systems feature one or two small photovoltaic panels and a microinverter and generate enough power to charge a laptop or power a small fridge. Meanwhile, the United States has yet to take the first step of creating a safety standard for the technology.

Is there a market for balcony solar?

Here in the US, though, there is no market for balcony solar. Ward, a Republican state representative in Utah who learned about the tech last year, wants that to change. The way he sees it, this is an obvious solution to surging power demand. “You look over there and say, ‘Well, that’s working,’” he told Grist.

Is America ready for a balcony-mounted solar panel?

In countries like Germany, balcony-mounted solar panels are all the rage. But from breaker-masking to voltage mismatches, America’s grid isn’t ready for it—yet. This story originally appeared on Grist and is part of the Climate Desk collaboration.
