Hungary's mobile energy storage container with bidirectional charging

Overview

Will Hungary's new battery energy storage system help Green the grid?

The new facility supports a growing push to green Hungary's power grid. Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition.

Is Hungary stocking up on battery backup?

Hungary isn't alone in stocking up on battery backup as it charts its green energy path. In neighbouring Bulgaria, a massive 124 MW/496 MWh battery energy storage system went live in Lovech earlier this year.

Is Hungary a good place to buy a battery?

After entering the world's top ten in photovoltaic capacity per capita, Hungary is picking up pace in terms of batteries as well. Energy storage units are coming online to maintain grid stability and bridge the hours between the peaks of daily solar power production and electricity consumption.

Why should Hungary invest in batteries?

It will help grid security and the integration of renewable energy sources. After entering the world's top ten in photovoltaic capacity per capita, Hungary is picking up pace in terms of batteries as well.
