## Overview

---

Can a vanadium flow battery be used in a solar project?

STS Group, a leading Hungarian renewable energy project developer, has purchased a 1.5 MWh vanadium flow battery for use in a solar plus storage project near the municipality of Öskü, central Hungary.

Why are EV traction batteries made in Hungary?

Over the last years, many of the leading EV traction battery manufacturers and their suppliers chose Hungary as the location of their newly established manufacturing plants. This is in line with the goal of the Hungarian government to become one of the main battery producer countries not only in Europe, but also at global level.

Who makes EV batteries in Hungary?

The only exception is BYD, which operates (among others) a bus assembly plant in Hungary and uses its own batteries. In below, we provide a slight overview about the EV battery producer companies which already operate manufacturing plants in Hungary or announced to do so in the near future.
