Installing a generator on a container truck

Overview

Can a clip on generator be installed on a reefer container?

Clip on generators can be installed on the reefer container, therefore fitting more flexibly. Mounting and replacement can be done within minutes. Thus, a clip on generator is the perfect solution for refrigerated containers that are transported on ships, trucks or rail, as well as for storage in places where no power connection is available.

What is a containerized generator set?

(-) On a regular basis, containerized generator sets (CGS) are placed onboard ships to provide replacement power in case of damage to one of the ship's generator sets, or additional power, e.g. to provide power to extra deck equipment or reefer containers.

How to choose a generator for a reefer container?

An undermount generator is especially suitable if you want to transport by frequently changing containers by truck. A generator of this type has a weight of around 700 kilograms. Clip on generators can be installed on the reefer container, therefore fitting more flexibly. Mounting and replacement can be done within minutes.

What is a genset on a reefer container?

The Genset, also known as a Clip On Generator, is a handy unit that clips onto the chassis of a Reefer Container to provide power when an external source of power is not available, such as during transport. Our Gensets run on diesel, gasoline or gas. Disc type radial fan for cooling: Sealed large diameter rear bearing.
