

# **Jimoko m6 with portable power supply**

## Overview

---

Is the jmgo M6 a good projector?

Let us explain in our full review. The M6 is the third projector we've tested from JMGO, following on from the JMGO View and JMGO G1. Sadly it's not even slightly in their league, in terms of design or functionality, but that doesn't make it any less cool for streaming big-screen media anywhere you like.

What is a jmgo M6?

The JMGO M6 is a golden glossy plastic, so a bit of a come-down there, and it includes two small 2W speakers that are adequate but not inspiring. You can hear the fan over the audio even at max volume, though you can play around with the fan-speed settings. The M6 is roughly the size of a large purse, and lightweight at 432g.

How many dB does the jmgo M6 have?

JMGO quotes 30dB from the M6. The JMGO M6 supports dual-band 802.11n Wi-Fi and Bluetooth 4.0. Marie is Editorial Director at Foundry.

Can you put a jmgo M6 on a wall?

But as far as we can tell – at least when tested using our Galaxy S8 – you can't just plug in a phone and have the JMGO M6 mirror its contents to the wall. Instead you need to install the HappyCast app on your phone, which is Chinese, fiddly and a bit flaky, then cast your screen to the projector.
