

Kyiv solar panels solar power generation

Overview

Are solar panels a new commodity in Ukraine?

Nazariy Hychka surveyed the roof of the Kyiv maternity hospital he runs as workers installed a scarce and suddenly vital new commodity in Ukraine: solar panels. Waves of devastating drone and missile attacks by Russian forces have again crippled Ukrainian power plants, causing blackouts and forcing Ukrainians to plan for the worst.

How much solar power does Ukraine have in 2024?

Figures from the Solar Energy Association of Ukraine (SEAU) earlier this year showed that the country added around 850MW of solar PV capacity in 2024, the majority of which came from self-consumption systems installed by businesses. It's "become a trend", Semenyshyn says.

Can solar power plants help Ukrainian society?

"Solar power plants can help Ukrainian society," Sokolovskyi says, by giving energy independence to private citizens and businesses. Moreover, support for critical infrastructure like hospitals, clinics and schools – the kind of work Semenyshyn's Repower Ukraine does – often comes from PV and energy storage combined.

Is solar a viable alternative to traditional energy in Ukraine?

Bondarenko, the renewable energy researcher, said that while solar is useful in a bind, it was less stable than traditional sources. Ukrainian authorities would need to overhaul the energy system to dramatically increase its share in the country's energy mix, he added.
