Latest design of liquid-cooled battery cabinet

Overview

Why do battery cells have a smaller temperature difference with liquid cooling?

Therefore, battery cells will have a smaller temperature difference with liquid cooling. Without fans on battery modules for air cooling means no noise emission from battery modules. Cooling liquid powered by the pump will circulate inside battery modules and take the heat from batteries.

What are the technical specifications of hypercube liquid-cooling outdoor cabinet?

Technical Specifications Solutions Our Cases HyperCube Liquid-cooling Outdoor Cabinet Intrinsically Safe Smart and Efficient Flexible Deployment Easy Maintenance IP67-rated battery pack, pack-level fire protection, multi-layer fuse protection, multi-dimensional electrical detection.

How many temperature detectors does a battery module have?

Each battery module has 8 temperature detectors. There are 2 racks that fit in a single battery cabinet, 9 slots in each battery rack to accommodate 8 battery modules and total 1 BSPU (Battery Switch & Protective Unit). Racks are connected in parallel and paired with a system BMS to meet the power and energy requirements of the application at hand.

What is a battery module?

Battery Modules are formed by configuring 52 LFP cells in a series connection. The modular design enables customized configurations, ease of maintenance, and future expandability. Each battery module is equipped with a battery management system (BMU) to form a rack-mountable module assembly.
