

# **Liberia solar tracking system dual axis**

## Overview

---

What is a dual axis solar tracker?

ECO-WORTHY dual axis solar tracking system can control the dual-axis linear actuator to make the solar panel to follow the sunlight, Keep the solar panel always face the sunlight. Production from a dual-axis solar tracker will increases annual output by approximately 40% compare to a fixed solar system.

Can programmable logic control a dual axis solar tracking system?

Sungur focused on the de- sign of programmable logic control for a dual-axis solar tracking system and experimentally verified that 42.6% more energy could be obtained from the system than from PV panels at fixed positions.

Does a dual axis solar tracking system generate more energy?

In a comparison of the data obtained from the measurements, 24.6% more energy was seen to have been obtained in the dual-axis solar tracking system compared to the fixed system. This study possesses potential value in small- and medium-sized photovoltaic applications.

Is a dual-axis solar tracking system possible?

Al-Rousan et al. have proposed a dual-axis solar tracking system by integrating supervised logistic regression and a supervised multilayer perceptron in order to increase the accuracy of tracking prediction.
