# Libya Communications Company Base Station

## Overview

---

What has happened to Libya's Telecom infrastructure?

During the last few years Libya has struggled to rebuild its economy and infrastructure following disruption caused by the civil war and the subsequent political unrest. Much of the telecom infrastructure was destroyed or stolen following the 2011 disturbances, including about a quarter of the country's mobile tower sites.

What telecommunication companies does Libyana work with?

Libyana has partnerships with several international telecommunications companies, including ZTE, Huawei, Ericsson, and Nokia, which provide the company with the latest technology and equipment to improve its network and services. Libyana is the leading mobile network operator in Libya, with a market share of around 50%.

Who owns the telecommunications sector in Libya?

The telecommunications sector in Libya is dominated by two state-owned companies, Libyan Post, Telecommunication and Information Technology Company (LPTIC) and the General Post and Telecommunications Company (GPTC).

What is the value of the telecommunications sector in Libya?

The current exact value of the telecommunications sector in Libya is not available. However, the sector is considered an important contributor to the country's economy and has potential for growth.
