Lima Mobile Energy Storage Container 15kW

Overview

What is the maximum output power of the pc15kt mobile energy storage system?

The maximum output power is 22kW. The system intelligently balances between battery and generator power. During the power surges (e.g., pump startup), the system can provide instant power support when generators need supplemental power. 9. What certifications are currently being planned for the PC15KT mobile energy storage system?

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO4) combined with an intelligent 3-level battery management system (BMS);

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.
