

# Liquid-cooled solar container battery cabinet address

## Overview

---

What is included in a battery cabinet?

Each battery cabinet includes an IP56 battery rack system, battery management system (BMS), fire suppression system (FSS), HVAC thermal management system and auxiliary distribution system. Outdoor liquid cooled and air cooled cabinets can be paired together utilizing a high voltage/current battery combiner box.

Can a liquid cooled and air cooled cabinet be paired together?

Outdoor liquid cooled and air cooled cabinets can be paired together utilizing a high voltage/current battery combiner box. Outdoor cabinets are manufactured to be a install ready and cost effective part of the total on-grid, hybrid, off-grid commercial/industrial or utility scale battery energy storage system. BESS string setup examples are:.

What is a liquid cooling system?

The integrated frequency conversion liquid cooling system helps limit the temperature difference among cells within 3 °C, which also contributes to its long service life. It has a nominal capacity of 372.7 kWh with a floor space of just 1.69 square meters. The system is suitable for inverters with operating voltages ranging from 600 to 1500 volts.

What is the difference between air cooled and liquid cooled batteries?

The air-cooled PACK consists of standard 280Ah lithium iron phosphate (LiFePO<sub>4</sub>) battery cells of series and parallel connection. The liquid-cooled PACK consists of standard 280Ah lithium iron phosphate (LiFePO<sub>4</sub>) battery cells of series and parallel connection.
