Malabo 300 solar air conditioners

Overview

What is a solar air conditioner?

Solar air conditioners are solar-powered air conditioners designed to efficiently and effectively provide cooling to a room. Solar air conditioners use solar panels to power the air conditioner, and solar hotspot energy gives much power to the air conditioner's condenser and refrigerant.

What is a split solar air conditioner?

Split solar air conditioners are air conditioning system that uses solar energy to power the compressor and the cooling process. They consist of two main components - an indoor unit and an outdoor unit. The indoor unit is installed inside the room, while the outdoor unit is installed outside, usually on the roof or a balcony.

How many square ft can a solar air conditioner cool?

The air conditioner can heat or cool up to 750 Sq. Ft (69 m²). It is a self-cooling air conditioner that requires no grid connection. This air conditioner operates on 100% solar power and does not require batteries, an inverter, or a charge controller. It also works on grid power when the best solar conditions are unavailable.
