Manila Energy Storage Equipment Renovation Project

Overview

What is the future of energy storage in the Philippines?

Under the Philippine energy scenario, peak demand is seen growing by 5.3 percent annually until 2028. Energy storage is stepping into the spotlight of the country's green transition, with more companies making bold investments to unlock its game-changing potential.

How many MW of new storage capacity will be built in Philippines?

Around 1,340 MW of new storage capacity, meanwhile, still does not have a definite commercial operations date. The construction of these facilities is expected to augment the country's power supply amid growing energy demand. Under the Philippine energy scenario, peak demand is seen growing by 5.3 percent annually until 2028.

Why should the Philippines invest in energy storage?

Bolstering decarbonization goals: The Philippines is a signatory to the Paris agreement and is committed to reducing greenhouse gas emissions. Energy storage facilitates the integration of renewable energy, supporting the transition to a cleaner energy mix.

Why is ACEN redefining energy transition in the Philippines?

Each project is a step forward in our mission to deliver efficient and sustainable energy solutions across the region. ACEN is redefining energy transition in the Philippines through the strategic implementation of advanced energy storage systems co-located in some of its renewable energy projects.
