Mauritania makes outdoor power

Overview

Mauritania has signed its first independent power producer contract, a \$300 million agreement with Iwa Green Energy to develop a 60-megawatt hybrid solar-wind power plant. What is Mauritania doing now?

Mauritania has just inked its first independent power producer contract which is a \$300 million agreement that was signed with Iwa Green Energy that will foresee the development of the 60-megawatt Mauritania Hybrid Solar-Wind Plant. Furthermore, the renewable energy project marks a milestone in Mauritania.

How does Mauritania get its electricity?

The last 24% is insured by the electricity importation coming from Manantaly hydro power plant based in Mali. In 2011, electricity production stood at 136 megawatts (MW) in Mauritania and was 100% from thermo power. Mauritania aims to increase and diversify its energy sources.

How will Mauritania increase its energy sources?

Mauritania aims to increase and diversify its energy sources. For example, it has developed an electricity plant that will be alimented by Banda gas. This facility should produce 350 MW in 2015 and will be connected to Nouakchott and Nouadhibou. Furthermore, the plant should produce 700 MW and could export electricity to Senegal and Mali.

How much energy does Mauritania use?

Some projects are emerging to benefit from solar, wind and biomass resources and to increase the access rate to the grid. According to RPTES/World Bank study, consumption of Energy Mauritania stands to 481.000 tonnes of oil equivalent (toe).
