# **Mauritius Rongji A-panel solar power generation**

## Overview

---

Will Mauritius move to solar PV power generation?

The project seeks to accelerate sustainable on-grid PV electricity generation in Mauritius by leveraging \$ 17.5 million in private sector investment over its four-year implementation period. Moving to a Solar PV Power Generation in Mauritius, Rodrigues and the Outer Islands.

Does Mauritius have solar and wind energy?

However, at present, the exploitation of solar and wind energy is still at the inception stage in Mauritius. Hydropower plants, with a combined installed capacity of 60 MW, contribute to some 4% of the total energy production. The share of bagasse in the energy mix accounts for around 11%.

Will Mauritius meet its 2% target for on-grid PV by 2025?

The project aims to help Mauritius meet (and maybe even surpass) its target of 2% of electricity generation from on-grid PV by 2025. This target was established in the country's "Long Term Energy Strategy 2009-2025". UNDP supports efforts to raise awareness on renewable energy among women associations in Mauritius.

Where are the thermal power stations located in Mauritius?

Most of CEB's thermal power stations are located in the vicinity of the Port Area in Port Louis on account of on-shore fuel handling facilities which are readily available for unloading of fuel. Mauritius has a good solar regime, with a potential average annual solar radiation value of some 6 kWh/m<sup>2</sup>/day.
