# Morocco solar Energy Storage

## Overview

---

Does concentrated solar power work in Morocco?

Bouhal el al. mapped Morocco in accordance with climate zoning in order to compare the energy generated by concentrated solar power (CSP) systems, particularly parabolic trough systems. The results confirmed the cost-effectiveness of this technology on a large scale (less expensive and more productive).

Why is Morocco investing in solar power?

Morocco is intensifying investment in solar power in the hope of hitting a target to raise the use of renewables in its energy mix to more than half. The country has set a target of 52 percent renewables by 2030 after achieving previous targets, local media reported.

Is Morocco planning a giant power storage facility?

Morocco is also planning to invite bids for a giant power storage facility with a capacity of nearly 1,600MW, the officials said. The facility, which will use batteries, will supply power to Kenitra and nearby areas.

How many MW is a solar PV system in Morocco?

“Maroc Photovoltaïque”, which consists of implementing a PV system with a capacity of 10 MW in the province of Jerada, is scheduled for commissioning in 2024. In addition, “Green Power Morocco”, with a capacity of 30 MW, is being developed by the company Green Power.
