

# Motor circuit breaker factory in Poland

## Overview

---

What is a motor circuit breaker?

Motor circuit breakers are used to switch on and protect electric motors against short-circuits, overloads and phase asymmetry. Thus, they play an important role in automation control circuits and electrical systems.

How do circuit breakers protect motors?

Circuit breakers can also protect single-phase motors by appropriately connecting the three-phase system in series. The devices contain two releases: thermal class 10 (motor overload protection) and electromagnetic (short-circuit protection).

What is a MMS motor circuit breaker?

MMS type motor circuit breakers are produced in 3 housing sizes and switch off currents up to 100 A, which means protection of 3-phase motors up to and including 45 kW. Circuit breakers can also protect single-phase motors by appropriately connecting the three-phase system in series.

## Motor circuit breaker factory in Poland

---

breaker Manufacturer/Producer Poland

All suppliers for breaker Manufacturer/Producer Poland Find wholesalers and contact them directly B2B marketplace Find companies now!
