N-type double-glass solar module model

Overview

Which bifacial double glass module produces more energy?

The bifacial double glass module produces more energy. Our N-type models have superior bifaciality. This means that the rear side of the module can produce up to 85% of the energy generated by the front side. Thus, the panel generates more energy overall. Lower degradation means a higher return on investment.

What are the advantages of n-type solar modules?

Module power increases 5-25% generally, bringing significantly lower LCOE and higher IRR. The N-type module with Hot 2.0 technology has better reliability and lower LID/LETID. Certified to withstand: wind load (2400 Pascal) and snow load (5400 Pascal). Refer. Bifacial Factor ©2023 Jinko Solar Co., Ltd. All rights reserved.
