New Zealand Energy Storage Container 40kWh

Overview

Where can I rely on a containerised energy storage solution?

Today, we are also a name you can rely on for safe battery storage. Our containerised energy storage solutions are available as 10ft and 20ft high cubes and stand almost 3m tall, they can be deployed all over New Zealand and further afield (we have a footprint in 90+ countries).

Does CentrePort have a battery energy storage system?

CentrePort is taking another step on its energy journey with an onsite battery energy storage system (BESS) which will improve resilience and enhance the potential for future emission reductions.

Who can use our rentable battery storage containers?

Private individuals and businesses can use our rentable battery storage containers in any setting where they can physically be installed. Benefits include: Energy independence: break free from the grid and power your home or workplace with clean, reliable energy that you control.

Will we need 100 TWh of energy storage by 2050?

All over the world, the pace of renewable energy generation is growing exponentially. In the UK alone, 41% of all electricity now comes from renewable sources. While some of this is pumped straight into the grid for immediate use, the Royal Society predicts we will need 100TWh of grid-scale energy storage by 2050.
