# New energy storage charging station

## Overview

---

Will Tesla build a grid-side energy storage station in Shanghai?

SHANGHAI, June 21 (Xinhua) -- U.S. carmaker Tesla on Friday inked a deal with Chinese partners to build a grid-side energy storage station in Shanghai using its Megapack energy-storage batteries.

Where is Tesla's gigawatt-hour-scale energy storage station located?

The gigawatt-hour-scale energy storage station is to be located in the Lin-gang Special Area of China (Shanghai) Pilot Free Trade Zone, as per the deal signed by Tesla, the administrative committee of the Lin-gang Special Area, the people's government of Shanghai's Fengxian District, and China Kangfu International Leasing Co., Ltd.

Can energy storage technology be used in charging and swapping stations?

The application of energy storage technology in charging and swapping stations has broad prospects, which can improve energy utilization efficiency, reduce operating costs, and promote the sustainable development of the electric vehicle industry.

How much does a battery energy storage system cost?

For example, when there is a peak load increase of 1200 kW in EV charging stations, the cost of a one-hour lithium-ion battery energy storage system (1200 kW·h & 1200 kW) is 0.235 million USD, which is approximately 4 times the cost of a 1200 kVA pad-mounted distribution transformer.
