New energy storage drives over 100 billion yuan investment

Overview

According to the data of the National Energy Administration, from the perspective of investment scale, since the "14th Five-Year Plan", the new new energy storage capacity has directly promoted economic investment of more than 100 billion yuan, driven the further expansion of the upstream and downstream of the industrial chain, and become a "new driving force" for China's economic development. Will China develop new energy storage systems between 2025 and 2027?

BEIJING, Sept. 12 -- China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure the stability of new-type power systems.

Why is China moving to a new type of energy storage?

The move is part of China's broader push toward a green, low-carbon energy transition as well as high-quality economic and social development. It builds on significant growth in the sector. As of the end of 2024, the country's installed capacity of new-type energy storage had reached 73.76 million kilowatts, according to official data.

Which regions in China have the most energy storage capacity?

Geographically, the top five provincial-level regions in China for cumulative installed capacity of new energy storage are Inner Mongolia, Xinjiang, Shandong, Jiangsu, and Ningxia.

What is new energy storage?

New energy storage refers to energy-storage technologies other than conventional pump storage. An energy-storage system charges when wind power or photovoltaic power generates a large volume of electricity or when the power consumption is low, and it discharges otherwise. China's operational efficiency of new energy storage continues to improve.

New energy storage drives over 100 billion yuan investment

China opens 'golden circuit' in new-type energy storage, ...

May 8, 2024 · Since the beginning of the 14th Five-Year Plan period, newly installed new-type energy storage capacity in China has directly promoted investment of more than 100 billion ...

Thirtyfold Growth in Five Years! From China to the World, New Energy

Nov 10, 2025 · China's New Energy Storage Drives Trillion-Yuan Industrial Investment New energy storage is a key technology in building a new energy system and a modern power ...

China opens 'golden circuit' in new-type ...

May 8, 2024 · Since the beginning of the 14th Five-Year Plan period, newly installed new-type energy storage capacity in China has directly promoted ...

China's Qinghai Inks 100B Yuan Deal to Build 50GWh Energy Storage ...

2 days ago · A total of 116 projects have been signed with a total investment of over 150 billion yuan. The landing of this billion dollar energy storage project marks a breakthrough in the ...

44 BILLION YUAN 14 PV COMPANIES IN CHINA WITH ...

New energy storage drives over 100 billion yuan investment Since the beginning of the 14th Five-Year Plan period, newly installed new-type energy storage capacity in China has directly ...

Yunnan Signs 126 New Energy Storage Projects Since 2023, ...

Jun 25, 2025 · Source: Kunming Daily Since 2023, Yunnan Province has signed 126 new energy storage projects with a combined investment exceeding RMB 130 billion, according to the ...

China surpasses 100 million kW in new energy storage

2 days ago · China's new energy storage capacity has exceeded 100 million kilowatts, marking a major milestone in the nation's transition toward a new-type energy system and consolidating ...

China unveils three-year action plan to boost new-type energy storage

Sep 12, 2025 · The country aims to achieve more than 180 million kilowatts of installed new-type energy storage capacity by 2027, which is expected to drive approximately 250 billion yuan ...

Economic Watch: China's new energy storage capacity ...

Jan 24, 2025 · Moreover, the flexible layout and short construction cycle of new energy storage, along with its wide range of application scenarios, have directly driven investments nearing ...

China's Energy Storage Leader Soars to Record High as ...

Oct 30, 2025 · The energy storage leader has been at the forefront of these developments,

investing over 10 billion yuan in research and development (R& D) annually. Its partnerships ...

SPIC'S 100 BILLION CLEAN ENERGY INVESTMENT PLAN

New energy storage drives over 100 billion yuan investment Since the beginning of the 14th Five-Year Plan period, newly installed new-type energy storage capacity in China has directly ...

Over 13.6 Billion Yuan in Total Investment: New Progress for Energy

Nov 11, 2025 · The project has a total investment of 6.115 billion RMB and is being constructed by China Construction Seventh Engineering Division Fourth Company. It will be built in two ...

China's New Energy Storage Capacity Surpasses 100 Million ...

Nov 13, 2025 · A Trillion-Yuan Industrial Boost Since the beginning of the 14th Five-Year Plan (2021-2025), China's investment in new energy storage projects has exceeded 200 billion ...

New energy storage drives over 100 billion yuan investment

Since the beginning of the 14th Five-Year Plan period, newly installed new-type energy storage capacity in China has directly promoted investment of more than 100 billion yuan (\$13.93 ...

DBM Video: 300MW/2.4G Wh! EPC of Xinjiang Energy Storage ...

3 days ago · In Fujian, Zhejiang and other logistics hubs, heavy truck "oil to electricity" has become a new trend, which also drives a new round of power grid upgrading and ...

New Dynamics of Signing and Commencement for Energy Storage ...

Nov 28, 2025 · The project was invested in and constructed by Beijing Tianqi Hongyuan New Energy Technology Co., Ltd., with Tianjin Qihong Energy Storage Technology Co., Ltd., a ...

New energy storage welcomes major opportunities, and 3-5 100-billion

Nov 8, 2024 · According to the data of the National Energy Administration, from the perspective of investment scale, since the "14th Five-Year Plan", the new new energy storage capacity has ...

China's new energy storage opens up a "golden track" and ...

China's new energy storage opens up a "golden track" and directly promotes over 100 billion yuan of investment

China Unveils New Energy Storage Large ...

Sep 12, 2025 · China aims to more than double its new energy storage capacity to over 180 GW by 2027, driving around 250 billion yuan in ...

1 billion yuan of energy storage has become a new benchmark

Sep 24, 2025 · After reaching production capacity, a complete industrial chain of battery cell manufacturing, energy storage core components, and energy storage system integration will ...

China Unveils New Energy Storage Large-Scale Construction ...

Sep 12, 2025 · China aims to more than double its new energy storage capacity to over 180 GW by 2027, driving around 250 billion yuan in investment, as recent government plans signal a ...

China's new energy storage opens a "golden track" in the 100 billion

In 2024, "developing a new type of energy storage" was included in the government work report for the first time. Now, various new energy storage technologies have been applied ...

New energy storage tops 100m kW

Nov 12, 2025 · "Since the start of the 14th Five-Year Plan period (2021-25), investment in new energy storage projects in China has exceeded 200 billion yuan (\$28 billion), driving over 1 ...
