New policy for solar glass

Overview

Should China reassess its solar policy?

Over recent decades, China has risen to a preeminent global position in both solar photovoltaic (PV) adoption and production, a feat underpinned by a suite of pivotal policy measures. With a burgeoning demand for PV systems on the horizon, there is an urgent need to reassess past policies and chart new directions.

Why are solar glass suppliers investing in new production capacity?

As PV module capacity increases, glass suppliers are investing in new solar glass production capacity. New facilities are popping up in North America, with unique features to ensure competitiveness, such as using recycled material.

Will declining solar PV glass prices bolster global market growth?

The global solar PV glass market is characterized by several key trends that are expected to play an important role in the coming years. Declining solar PV glass prices are presumed to bolster the global market growth over the forecast period.

Will solar pattern glass reach 100 GW by 2030?

Anshul Vishal, head of corporate development at CPS, estimates that demand for solar pattern glass in North America will reach nearly 100 GW by 2030. This growth is driven by the reshoring of the solar panel manufacturing supply chain in the US.
