## Overview

---

Are battery energy storage systems a key part of the Nordic energy transition?

Battery energy storage systems (BESS) continue to play a vital role in the Nordic energy transition. Based on Marsh's experience in advising BESS owners in the Nordics, cold climate challenges, ensuring safety, and optimizing spacing are key topics that are discussed for BESS development in the region.

Is Norway the 'battery of Europe'?

Image: Ingrid Capacity. While Norway once aimed to be the 'battery of Europe' it has since been overtaken other Nordic countries Sweden and Finland for BESS deployments. Research firm LCP Delta's Jon Ferris explores the region's energy storage market dynamics in this long-form article.

Why should we invest in EV battery recycling in Norway?

Our BESS holds immense potential for contributing to Norway's burgeoning clean energy landscape. Upon installation at the EV battery recycling facility, Hydrovolt, it will play a pivotal role in optimizing energy utilization and unlocking new revenue streams.

Are battery energy storage systems sustainable?

Discover sustainable solutions, crucial for the stability of the power system, that provide rapid response times, cost-effectiveness, and adaptability. Battery energy storage systems emerge as a pivotal force in sustaining the electrical grid's reserves, particularly within the Frequency Containment Reserves market.
