Off-grid solar-powered containerized farms in the Middle East pricing information

Overview

Will solar power prices reach grid parity?

This trend will continue to increase as solar power prices reach grid parity. In 2019, the global estimated additions of solar photovoltaic (PV) reached almost 138 GW (Figure 1). Within the Middle East and North Africa (MENA) region, the increased industrial activity and drive towards renewables is reflected in each country's strategy.

What is an off-grid solar project?

Off-Grid Project Deployments: Off-grid solar projects can provide electricity to remote areas which currently lack access to the main grid, thereby improving energy access and promoting self-sufficiency.

Does Saudi Arabia have a solar farm?

Saudi Arabia's solar expansion is equally impressive. The Sudair Solar Park, developed by ACWA Power and Aramco, will deliver 1,500 MW upon full completion in 2025, helping the country move toward its Vision 2030 renewable energy goals. This is just one of many gigascale solar farms under development.

How can we triple off-grid renewables capacity?

To triple off-grid renewables capacity from the 2023 baseline to a projected 38.7 gigawatts by 2030, governments and other stakeholders must prioritise the following actions: Implement supportive policies and regulations that create an enabling environment for off-grid solutions (e.g. streamline permitting and licensing, market access, tariffs).
