

PV 360 Panel Specifications

Overview

Why should you choose Panasonic evervolt® module PK Black series solar modules?

Panasonic EVERVOLT® Module PK Black Series solar modules produce more power over the long haul fueled by industry-leading conversion efficiency and low degradation rate. Superior module efficiency of 20.3% and 19.7% and greater high-temperature performance deliver a high-output renewable energy source for residential solar systems.

What are the benefits of evervolt ® Black series solar panels?

Superior module efficiency of 20.3% and 19.7% and greater high-temperature performance deliver a high-output renewable energy source for residential solar systems. Available in 370-watt and 360-watt, EVERVOLT ® Black Series panels are covered by a complete 25-year warranty from one of America's most trusted brands.

What is a solar panel temperature coefficient?

A solar panel's temperature coefficient is a measurement indicating how well a specific model of solar panel will perform outside of ideal operating conditions. Knowing a panel's temperature coefficient and the temperature of the panel allow you to predict your panel's performance during the dog days of summer.

What temperature does a solar panel perform best at?

Solar panels perform best at 77°F (25°C). Here in Texas, obviously, we see temperatures that far exceed 77°F for long portions of the year. A solar panel's temperature coefficient is a measurement indicating how well a specific model of solar panel will perform outside of ideal operating conditions.
