

Pcs energy storage inverter in Alexandria Egypt

Overview

What is a PCs power conversion system?

PCS is a high power density power conversion system for utility-scale battery energy storage systems (up to 1500 VDC). It is optimized for BESS integration into complex electrical grids and is based on our best-in-class liquid cooled power conversion platform, enabling greater scalability and efficiency. Key highlights.

Is PCs compatible with battery manufacturers?

Optimized for BESS integration into complex electrical grids, PCS is compatible with leading battery manufacturers. It is based on our best-in-class liquid cooled power conversion platform to provide you with greater efficiency, flexibility, performance, and scalability.

What is PCs & why is it important?

PCS enables the maximum number of DC block connections per station, which is especially important to increase flexibility, power flow, and redundancy for your large projects.
