Overview

What is a smart PV system?

It provides smart PV solutions for residential, commercial, industrial, utility scale, energy storage systems, and microgrids. It builds a product ecosystem centered on solar inverters, charge controllers, and energy storage to promote sustainable and efficient utilization of solar energy.

What is a 5kw solar storage system?

The 5kw solar storage system was installed in 2018. We were initially attracted to the idea of using lithium batteries at night while solar power supply our house during the day. In addition, it can also provide seamless grid failure protection.

What power source does pvmars use?

The current power source is the 30kw hybrid solar wind energy system. In our limited budget and installation area, PVMARS recommends using a solar wind system. This can reduce the battery footprint, but also provide a 24-hour uninterrupted and stable power supply.

What is the battery capacity of a solar inverter?

25 years guarantee (CE TUV). Capacity: 12V100Ah-250Ah gel battery Or 360V100Ah-400Ah Lithium (LFP cell) battery - Stackable The latest in through-wall welding and full-sealing technology.
