## Overview

---

Will Cambodia invest 210 billion in solar energy by 2043?

Phnom Penh, Cambodia – The Cambodian government has announced a historic investment plan in solar energy projects worth over 210 billion baht by 2043. This is part of its Power Development Masterplan (PDP) to transition the country towards clean energy and reduce carbon dioxide emissions.

Why is Cambodia launching a wind farm in 2027?

The wind farm adds a new dimension to its renewable energy portfolio, reinforcing its role in driving sustainable development across Southeast Asia. will harness the region's untapped wind resources. This project growing power demands. Scheduled for completion in 2027, the project represents a pivotal milestone in Cambodia's clean energy journey.

How many solar power plants are in Phnom Penh?

For solar energy investment, the plan aims to increase power generation capacity by approximately 2,450 megawatts, with an investment value of about 48 billion baht. This will involve developing 39 solar power plants across 11 provinces, including Phnom Penh, Kampong Chhnang, Kampong Speu, and Kampong Thom.

What does the IA mean for Cambodia's wind farm?

Together, we are not merely constructing infrastructure but shaping a cleaner, greener future for Cambodia.” Under the terms of the IA, Leader Energy will manage the wind farm for a 25-year period, reflecting its long-term commitment to driving sustainable energy solutions in the region.
