

Polish solar energy storage installation

Overview

What is Poland's energy storage subsidy?

Learn about Poland's €1 billion energy storage subsidy aimed at installing 5.4 GWh of BESS by 2028, strengthening grid stability and accelerating the green transition.

How can energy storage support Poland's electricity system?

By addressing challenges such as peak load balancing and frequency regulation, energy storage enhances the resilience and flexibility of Poland's electricity system. The storage support program is expected to begin accepting applications in the second quarter of 2025. Full details and deadlines will be published by the NFOŚiGW.

What are the requirements for a photovoltaic system in Poland?

6□Balcony PV sets. 7□Other devices approved for use in Poland. All photovoltaic installations must be connected to the national power grid. The capacity of the energy storage systems funded under the program must be at least 1.5 times the peak power (kWp) of the PV installation.

What are the new energy storage rules in Poland?

Poland's new rules state that energy storage facilities over 10MW require licensing to ensure they can provide services to Poland's National Power System\ . Facilities 10MW or smaller do not need licensing but do need to register with the transmission system operator or distribution system operator for their area.
