

Portugal Porto Energy Storage Integration Project

Overview

What does Portugal's energy storage tender mean for the energy transition?

Portugal's government has announced the outcome of an energy storage tender that will see the installation of 500 MW of energy storage capacity to support the country's energy transition. Energy storage battery. Photo by Anna Vasileva.

Can storage replace thermal generation in Portugal?

The pursuit of economic viability by storage facility owners will inherently lead to charging during low-cost hours and discharging during hours that are more economically attractive. Storage can replace thermal generation in constraint markets, easing the grid and supporting Portugal's 2040 phase-out target.

Can hydro-pumped storage systems be used in Portugal for 2030?

This work proposes a new methodological approach to assess the potential role of the hydro-pumped storage systems in Portugal for 2030, taking into consideration the impacts of climate change. 4.1.

Can the EnergyPLAN model reproduce the results of Portugal's electricity production system?

Based on the previous analysis, we can conclude that the EnergyPLAN model is generally able to reproduce the results of Portugal's electricity production system, with errors between 3 % (2021) and 7 % (2023) regarding natural gas generation, hydro generation and pumping balance and import-export balance.
