Portugal Porto solar container lithium battery Cycles

Overview

What is battery Cluster Portugal?

Battery Cluster Portugal has played an active role in promoting energy communities, enabling a more efficient and sustainable use of energy. Recently, applications for mini-agendas were opened, an opportunity that the Cluster is embracing to support the creation of energy communities.

Should Portugal produce battery-grade Li-compounds?

Therefore, the production of battery-grade Li-compounds in Portugal would aid the EU in lessening its dependence on external sources for this strategic metal, assisting as well in increasing the domestic supply of raw materials for battery manufacturing. Portugal has been the sole European lithium producer since 2011 (USGS 2024).

Why is battery recycling important in Portugal?

Battery recycling is also ensured with B.again, an initiative by DST Solar. This integration of the entire battery value chain within a 260km radius places Portugal in a privileged position in the sector, establishing itself as one of Europe's leading hubs for battery development and innovation.

Is Portugal a key hub in the battery value chain?

Portugal is establishing itself as one of Europe's key hubs in the battery value chain, from lithium extraction to recycling.
