# Power base station housing construction

## Overview

---

How are power station foundations constructed?

The construction of the power station foundations is carried out in accordance with a detailed programme drawn up to provide the various foundations and general site works, in the sequence necessary to enable the building work and plant installation to proceed in accordance with the overall construction programme.

What is the primary architectural objective of a power station?

The prime architectural objective would be to ensure the best possible appearance of the project, including buildings, structures and plant as seen from such viewpoints as are predominant in the public's perception of a power station, and to present a confident and consistent image as part of the CEGB's corporate design policy.

What makes a good power station design?

The best power station design is the one for which consent can be obtained, and to achieve this economically in landscape terms, a range of expertise and activities is required. The proposed site must be visually analysed by the appointed landscape architect, who will seek to minimise adverse effects of the project.

When will the construction work for a power station start?

1. When the process of the environment assessment is completed, the construction work for the power station will start. a. It is necessary to notify the government of the construction plan which describes the detailed design of power station facilities prior to the construction start. b.
