# Pr3 7v solar container lithium battery pack

## Overview

---

What are ionic lithium ion deep cycle batteries?

Features of ionic Lithium-ion Deep Cycle Batteries: Light weight, up to 80% less than a conventional, comparable energy storage lead-acid battery. Lasts 300-400% longer than lead-acid. Lower shelf discharge rate (2% vs. 5-8% /month). Drop-in replacement for your OEM battery. Expected 8-10 years of battery life.

What is a lithium ion battery?

A. Lithium-ion batteries are rechargeable batteries in which lithium ions move from the anode to the cathode during discharging and back when charging. They are popular batteries for use in consumer electronics because they provide high energy density, possess no memory effect and have a slow loss of charge when not in use.

What are the advantages of 18650 lithium ion battery pack?

This makes it extremely economical, and provides an expected life similar to that of the device in which it is used. 18650 lithium ion battery pack has low internal resistance and high flat voltage characteristics during strong current discharge, which ensures a wider application field. Provide long storage life with few limiting conditions.
