What is an off-grid EV charging station?

An off-grid EV charging station is a self-contained power plant that can charge one or more electric vehicles without a permanent connection to the utility grid. Solar panels capture energy, a charger controller conditions the power, batteries store it for later use, and an inverter supplies the alternating current required by most chargers.

What is a solar panels on shipping container?

It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. Efficient hydraulics help get the solar panels ready quickly. Due to its construction, our solar panels on shipping container offers unmatched flexibility and maneuverability.
