

# Price of laying solar panels

## Overview

---

How much does it cost to install solar panels?

On average, installing solar panels costs \$18,604 for a 6-kilowatt (kW) system before incentives and tax credits. The price range typically falls between \$20,548 and \$30,666, depending on various factors such as location, system size, and the type of panels used. Cost per watt is an essential metric to understand these costs.

How much does a solar system cost?

The price range typically falls between \$20,548 and \$30,666, depending on various factors such as location, system size, and the type of panels used. Cost per watt is an essential metric to understand these costs. On average, homeowners pay \$2.89 per watt for a solar system.

Are solar installations cheap?

Solar installations aren't cheap, but the actual equipment is a relatively small part of the total cost. It's only 35% of your total installation cost, according to the US Department of Energy. Soft costs, also known as the hidden costs of installing solar, are nonhardware costs, and they make up 65% of your total solar costs, according to the DOE.

How much does a solar battery cost?

They store the energy accumulated from the solar panels. The price varies based on the installer, application and location. Batteries typically cost \$12,000 to \$22,000, according to the Department of Energy, although smaller capacity systems are available for less. In some cases, solar batteries may be more expensive than solar panels.
