Price of solar panel equipment

Overview

How much does a used solar panel cost?

Used panels that are between one and nine years of age still operate at high-efficiency rates but are cheaper in price. The average price ranges from 50-75% less than new modules. EnergyBin tends to see second-hand modules for resale starting at \$0.10/W. The price depends on the age and efficiency level.

How much does a solar system cost?

On average, solar panels cost about \$9.34 per square foot of your home's total living space. This means a solar system costs about \$13,075 for a 2,000-square-foot house, including the solar tax credit. Note: Using square footage to estimate home solar system costs only offers a rough guide and will not provide a truly accurate price.

How much does solar panel installation cost?

The average installation cost for the solar panels is \$88 / hr. Items like solar panel quality and labour costs may impact your overall expenditures, but rates vary from \$77 / hr to \$105 / hr in general.

What equipment do you need to go solar?

To go solar, you'll need solar panels, inverters, racking equipment, and performance monitoring equipment--at a minimum. Depending on where you live, you may also consider a solar battery. The components of a solar panel system are pretty simple.
