

# **Price quote for 40-foot solar photovoltaic containers for Australian farms**

## Overview

---

How much do solar panels cost in Australia?

The average cost of solar panel installation in Australia is around \$1,000 per kW. For a popular 6.6kW system, expect to pay between \$5,000 - \$8,500 for good components and an installation that will last.

What is a solar powered shipping container?

At SCS Australia, we create solar powered shipping containers that combine renewable energy technology with the strength and mobility of a shipping container. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects—all while reducing carbon footprint and cutting energy costs.

What is a solar container build?

It's a modified shipping container built to house solar panels, batteries, inverters, and other off-grid power systems. These units are ideal for powering remote sites, construction camps, emergency setups, or as a portable backup energy system. What's included in a solar container build?

.

How much does a solar system cost?

1. System Components  
Solar Panels: High-efficiency panels designed for agricultural use cost approximately \$0.25 to \$0.40 per watt. A typical 100kW system would require an investment of \$25,000 to \$40,000 in panels alone.  
Inverters: These convert solar energy into usable electricity and account for about 10-15% of the total system cost.
