# Prices for installing solar panels on roofs in Ljubljana

## Overview

---

How much does it cost to install solar panels?

On average, installing solar panels costs \$18,604 for a 6-kilowatt (kW) system before incentives and tax credits. The price range typically falls between \$20,548 and \$30,666, depending on various factors such as location, system size, and the type of panels used. Cost per watt is an essential metric to understand these costs.

How much does a solar system cost?

The price range typically falls between \$20,548 and \$30,666, depending on various factors such as location, system size, and the type of panels used. Cost per watt is an essential metric to understand these costs. On average, homeowners pay \$2.89 per watt for a solar system.

How much does a solar system cost in 2025?

Average installation cost in 2025 is \$18,604 for a 6kW system before incentives, with prices ranging from \$20,548 to \$30,666 depending on size and location. The federal solar tax credit covers 30% of system costs and is available through 2032, greatly reducing your out-of-pocket expense.

Should you pay for solar panels in cash?

Paying for your solar panels in cash is the simplest and often the most cost-effective option. No interest, no monthly payments, just a one-time upfront cost. By paying in cash, you avoid finance charges and own your system outright from day one. This means you'll immediately start saving on your electricity bills.
