

Prices of uninterruptible power supply for domestic use in Spain

Overview

What are end-user prices in Spain?

End-user prices in Spain consist of several components: the energy cost (based on the wholesale market), regulated network fees (“peajes”), other charges, and taxes. There are two customer markets: the regulated tariff (PVPC) and the free market.

Why are electricity prices so low in Spain?

For household electricity prices, this difference is explained by lower gas prices and the bet on renewable sources of energy. According to Eurostat data, Spain is in line with the European Union in terms of taxes, with 17 percent of the price being VAT and other recoverable taxes and levies.

What is a dynamic electricity tariff in Spain?

Spain is a European pioneer in dynamic electricity tariffs – plans where prices change every hour, based on wholesale rates. The most common dynamic option?

PVPC (Precio Voluntario para el Pequeño Consumidor) – the regulated hourly tariff used by $\sim\frac{1}{3}$ of households. In 2024, it was reformed to include futures prices, reducing volatility.

Is Spain ready for a greener energy future?

Spain’s electricity market is undergoing a rapid and remarkable transformation. From record-breaking renewables to smarter tariffs and sweeping policy updates, the 2023–2025 period is setting the stage for a greener, more flexible energy future.
