

# Project Energy Storage

## Overview

---

Why is Tesla building a large-scale energy storage facility in China?

Their growing use helps stabilize power grids, prevent outages, and reduce reliance on fossil fuels. This project is Tesla's first large-scale energy storage installation in China, complementing its existing automotive manufacturing presence in the city through Giga Shanghai.

Will Tesla build a grid-scale battery energy storage station in China?

Tesla has officially signed a ¥4 billion (C\$764/US\$557 million) deal to build its first grid-scale battery energy storage station in China, leveraging its Megapack technology.

Does Tesla have energy storage?

Tesla's deep involvement in the energy storage industry now rivals its electric vehicles in importance, Tao said, adding that its energy storage products are currently used in over 60 countries and regions. The U.S. company already has a factory for its Megapacks in California, which has an annual capacity of 10,000 units.

Will a Megapack be used for energy storage in a data center?

Gong Wei, vice president of Lingang Group, said the Megapacks would be used for energy storage in a data center in the Lin-gang Special Area, as part of its efforts to achieve carbon peaking and carbon neutrality.
