# Proper installation of solar glass

## Overview

---

How to install a solar panel system?

It's easy to set them in the right position, thanks to mounting kickstands. It is thus convenient to install a solar panel system using portable modules. Portable folding solar panels are another, more compact option. A battery is needed to use solar energy during the night, and a solar controller for safe battery charging.

Where should a solar module be installed?

on4.1 Installation position and working environmentJA Solar modules are intended for use on land, no outer space use. Do not use mirrors or other magnifiers to concentrate sunlight onto the modules. Modules must be mounted on appropriate mounting structures positioned on suitable buildings, the ground, or other structures suitable for modules.

What is the minimum wire size for a solar PV system?

at the maximum short-circuit current of the modules. JA Solar recommends installers use only sunlight resistant cables qualified for direct current (DC) wiring in PV systems. The minimum wire size should be 4mm<sup>2</sup>(12AWG). After connecting onsite cables.

How to protect solar system from high loads?

ity and protect of the solar system from high loads. If solar modules are installed with trackers, it is recommended from safety side to use 2.5mm thickness and 60mm height and above purlin installation with 790mm, 1200mm, 1400mm holes in the module frame.
