Recommendations for outdoor power supplies with long battery life

Overview

How long does a portable power station last?

Like any battery, for example one in a phone or laptop, this will wear down over time until the power station no longer holds charge. General estimates put the lifespan of a portable power station at around ten years. Expect it to last approximately five years minimum with standard use. What can you run on a portable power station?

Do portable power stations make camping better?

A good portable power station makes camping better. These devices power lights, phones, and small appliances when you're outdoors. We spent three months testing power stations to find the best portable power stations for camping. We tested 30 portable power stations over 12 camping trips.

Is a 300 watt battery enough for camping?

While 300-400Wh is enough for basic camping needs, we chose higher capacity units for several reasons. Higher capacity allows longer trips without recharging. It also powers more devices at once, which helps when camping with family or friends. Larger batteries handle unexpected power needs and last longer between charges.
