

# **Reset circuit breaker factory in Hungary**

## Overview

---

How do you reset a tripped circuit breaker?

To reset a tripped circuit breaker, move the breaker handle to the full “off” position, then back to the “on” position. You should hear a distinct “click” as the breaker resets and the contacts engage. Make sure that the breaker is fully reset and the handle is securely in the “on” position.

What is a tripped breaker?

The terms "tripped breaker" or "tripped circuit" denote situations where the circuit breaker has automatically switched off due to an overload or short circuit, effectively cutting off the power supply to that specific area. This comprehensive guide aims to provide an in-depth understanding of circuit breakers and how to reset them.

How do I fix a tripped breaker?

Prepare to Reset the Breaker: Ensure all connected appliances are turned off before resetting the tripped circuit. Reset the Breaker: Firmly push the tripped breaker to the "off" position and flip it back to "on." Professional assistance may be necessary if it won't stay ON or immediately trips again (or if it's stuck in the middle).

Why is my breaker tripping?

Short circuits: If a breaker is prone to tripping and there's no obvious cause, it could indicate a problem in the circuit wiring. Turn off and unplug everything on the circuit, then reset the breaker. If it trips, turn off the breaker and call an electrician. Power off all electrical devices connected to the circuit breaker.
