# Reset circuit breaker factory in Jordan

## Overview

---

How long does it take a breaker to reset?

**Wait for Automatic Reset:** When an overcurrent or fault condition occurs, automatic reset breakers trip and disconnect the circuit. After a predetermined time delay, typically a few seconds to a few minutes, the breaker automatically resets itself and restores power to the circuit.

How to reset a circuit breaker safely?

Follow these detailed steps to reset a circuit breaker safely: Turn Off Appliances: Before resetting the circuit breaker, it's crucial to turn off all appliances and devices connected to the affected circuit. This step prevents potential damage to your electrical devices and reduces the risk of electrical hazards.

What happens when a breaker resets itself?

After a predetermined time delay, typically a few seconds to a few minutes, the breaker automatically resets itself and restores power to the circuit.

**Monitor for Recurring Trips:** While automatic reset breakers offer convenience by automatically restoring power, it's essential to monitor the circuit for recurring trips.

Why is my breaker not resetting?

**Short Circuit:** A short circuit can cause significant damage to electrical circuits and may prevent the breaker from resetting. Inspect the affected circuit for signs of a short circuit, such as burnt wires or a strong burning odor. If a short circuit is detected, it's essential to rectify the issue before resetting the breaker.
