

# **Rome centralized solar energy storage requirements**

## Overview

---

Will Italy support a centralised electricity storage system?

The European Commission has approved, under EU State aid rules a €17.7 billion Italian scheme to support the construction and operation of a centralised electricity storage system.

Why is a grid-scale battery energy storage system important in Italy?

As the penetration of solar power increases, grid stability has become a critical issue. In response, Italy is prioritizing the development of grid-scale battery energy storage systems (BESS Italy) alongside new industrial and commercial energy storage projects.

Is Italy a leader in industrial energy storage and commercial energy storage?

Accordingly, there is a growing market for industrial energy storage and commercial energy storage projects, positioning Italy as a leader in advanced Italy storage solutions and renewable energy Italy initiatives.

Why did the European Commission approve a centralized electricity storage scheme?

On this basis, the Commission approved the Italian scheme under EU State aid rules. The European Commission approves a €17.7 billion Italian scheme for centralized electricity storage, aiding renewable energy integration.
