Sao Paulo PV Module Project in Brazil

Overview

How many solar modules did Brazil import in 2025?

Brazil imported 10.6 GW of solar modules in the first half of 2025, down slightly year over year as developers rushed to secure shipments before an import tax hike, according to Greener.

How much solar power does Brazil have in 2024?

In 2020, the country's installed solar PV capacity stood at 8.5 gigawatts. By the end of 2024, this had grown to roughly 53 gigawatts. The Brazilian solar sector is experiencing a rapid expansion, with planned utility-scale installations amounting to more than 139 gigawatts as of February 2025.

How much solar power does Brazil have?

In the last five years, Brazil has increased its solar photovoltaic energy generating capacity by more than 6-fold. In 2020, the country's installed solar PV capacity stood at 8.5 gigawatts. By the end of 2024, this had grown to roughly 53 gigawatts.

Why is Sungrow Americas launching a solar project in Brazil?

Ada Li, Vice President of Sungrow Americassaid: "This is one of the Americas' largest solar projects located in Brazil, a country with vast potential for further solar power generation, which offers energy security and independence and reduces carbon emissions in this vital decade for the clean energy transition.
