What type of batteries can be installed on a Segway® Personal Transporter?

This lithium battery rebuild service is for Segway® personal transporters with models I167, I180, I2, X2, and SE. Some Segway® models may require a software update to use lithium batteries. This service requires additional processing time due to the quantity of labor that it takes.

How many cells does a Segway battery have?

Manual cell scanning: The Segway battery has a total of 92 cells installed. There are always 4 cells connected to a cell package, and then 23 of them in series. With the cell scan, only we can read out the voltages of the individual cell packets, which are then displayed graphically with OUR system. Why use us?
