Overview

What is Singapore's largest energy storage system?

In Singapore, we operate Southeast Asia's largest energy storage system. The 326MWh system on Jurong Island supports the country's growing deployment of solar energy, while enhancing grid reliability and energy supply security. Sembcorp Energy Storage System in Singapore.

Does Singapore need a solar energy storage system?

SINGAPORE - As Singapore seeks to harness as much sunshine as it can to maximise its limited renewable energy sources, it needs to improve technologies that can store excess solar energy from the day. One such technology is energy storage systems (ESS), which are essentially giant batteries packed in containers that store electricity for later use.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.
