## Overview

---

What is energy storage Ireland?

Energy Storage Ireland is a representative association of public and private sector organisations who are interested and active in the development of energy storage in Ireland and Northern Ireland. Delivering the energy storage technologies to enable a secure, carbon free electricity system on the island of Ireland by 2035.

Which battery energy storage systems are available in Ireland?

The Kylemore Battery Energy Storage System in Dublin went into operation in 2023 and has the capability of providing 30MW of fast-acting storage. The South Wall Battery Energy Storage System went live in 2023 and has the capability of providing 30MW of fast-acting energy storage.

Can battery energy storage help the Irish electricity sector?

We find that battery energy storage can become one of the cornerstones of the energy storage portfolio in Ireland and also one of the few options which can enable the Irish electricity sector to access the required domestic flexibility resources.

Can interconnectors compete with conventional energy storage units in Ireland?

Interconnectors are also approved as capacity market units and could participate in the capacity market. Based on current market instructions in Ireland, a battery energy storage should not only compete with conventional generations units, but also interconnectors are functioning as serious rivals, especially in the capacity market.
